ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

(54) Title: HUMAN C-TYPE LECTIN

(57) Abstract: The present invention provides a polynucleotide (mctl) which identifies and encodes a novel human C-type lectin (MCTL). The invention provides for genetically engineered expression vectors and host cells comprising the nucleic acid sequence encoding MCTL. The invention also provides for the use of substantially purified MCTL and its agonists in the commercial production of recombinant proteins and in pharmaceutical compositions for the treatment of diseases associated with the expression of MCTL. Additionally, the invention provides for the use of antisense molecules to mctl in pharmaceutical compositions for treatment of diseases associated with the expression of MCTL. The invention also describes diagnostic assays which utilize diagnostic compositions comprising the polynucleotide, fragments or the complement thereof, which hybridize with the genomic sequence or the transcript of mctl. The present invention also relates to anti-MCTL antibodies which specifically bind to MCTL.

INTERNATIONAL SEARCH REPORT

International Application No

PCT/US 97/12342

A. CLASSIFICATION OF SUBJECT MATTER

IPC 6 C12N15/54 C12N9/12 C12N15/70 C12N1/21 //(C12N1/21,
C12R1:19)

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 6 C12N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, SEQUENCE SEARCH, CHEM ABS Data, MEDLINE, BIOSIS

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	N. SUZUKI ET AL.: "Molecular Cloning and Expression of cDNA Encoding Human Macrophage C-Type Lectin" JOURNAL OF IMMUNOLOGY, vol. 156, no. 1, 1 January 1996 (1996-01-01), pages 128-135, XP002046614 cited in the application page 134, left-hand column, paragraph 2 -right-hand column, paragraph 2; figures 2,3 --- -/--	1,3,10, 11

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
